

ATIK SHAHRIAR

Full-Stack Software Engineer · TypeScript, Python & AI Developer Tooling

Bashundhara R/A, Dhaka, Bangladesh | +880 1302-228993 | atikrj8@gmail.com

Portfolio | GitHub: atik806 | LinkedIn: atik-shahriar | vibeflow.tech

PROFESSIONAL SUMMARY

Full-stack software engineer and CSE student at AIUB who takes products from an empty repo to production and keeps improving them after launch. Creator of **AgentDeck**, a cross-platform desktop workspace for AI coding agents shipping on Windows, macOS and Linux, and builder of a live wholesale e-commerce platform, an AI social-publishing SaaS and a fintech mobile app. Works mostly in TypeScript (Next.js, React, NestJS, Express, Supabase/PostgreSQL), with desktop apps in Python/Qt and mobile apps in React Native. 10+ live products and 55+ public repositories.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, C++, C#, SQL, PHP
Frontend:	React 19, Next.js 16, Tailwind CSS, Zustand, SWR, TanStack Query, Framer Motion
Backend & Data:	NestJS, Node.js / Express, Flask, Supabase, PostgreSQL, Firebase, REST APIs, JWT auth, Zod
Mobile & Desktop:	React Native, Expo, React Native Skia, Reanimated, Python + PySide6 (Qt), PyInstaller
AI & ML:	LLM APIs (Anthropic, OpenAI), MCP servers, Whisper speech-to-text, NLP, PyTorch, scikit-learn
DevOps & Tooling:	Git & GitHub, GitHub Actions CI/CD, Vercel, Docker, Linux, Jest, Vitest

EXPERIENCE

Creator & Lead Developer — AgentDeck | vibeflow.tech/agentdeck 2026 – Present

Desktop workspace for AI coding agents · Windows, macOS & Linux

- Designed and shipped a Python/PySide6 app that runs Claude, Codex, Copilot, Gemini and other coding agents side by side in real terminal panes, showing which agent is working, idle or waiting for input.
- Built an isolated git worktree per agent plus a review & merge panel, so parallel agents never collide on the same checkout.
- Integrated GitHub, Jira, Linear, Google Drive and LinkedIn plugins via MCP servers, along with local voice-to-text, routines, notes, layouts and a command palette.
- Run CI release pipelines for Windows, macOS and Linux builds with built-in auto-update; currently at v0.39.

Tech: Python · PySide6 / Qt · Git worktrees · MCP · Whisper · GitHub Actions

Full-Stack Developer — Freelance & Client Work 2023 – Present

E-commerce, SaaS & business platforms

- Built Dhaka Wholesale, a live e-commerce platform: Next.js 16 storefront plus a NestJS/Supabase API with an admin dashboard.
- Built PostPilot, a multi-platform social-publishing SaaS, and the VibeFlow web platform with a client portal and admin tooling.
- Delivered landing sites, dashboards and booking systems for small businesses, from requirements through deployment on Vercel.

Tech: Next.js · NestJS · TypeScript · Supabase · Vercel

SELECTED PROJECTS

Dhaka Wholesale | dhakawholesale.com Production

- Live storefront and admin platform for a Dhaka wholesale business: catalog, cart, checkout, orders, wishlist and reviews, with live order updates on the admin dashboard.
- Next.js 16 App Router with ISR catalog pages; NestJS 11 REST API hardened with Zod validation, Helmet, compression and rate limiting; Supabase Postgres, JWT and Realtime.

Tech: Next.js 16 · React 19 · NestJS · TypeScript · Supabase · Zustand · SWR

PostPilot AI SaaS

- AI-powered social publishing SaaS: write a post once, then adapt, schedule and publish it to every connected platform.
- Provider-agnostic AI layer (Anthropic and OpenAI) and a database-backed publishing queue with retries, exponential backoff and idempotency; Supabase RLS, encrypted platform tokens and Zod at every boundary.

Tech: Next.js 16 · React 19 · Supabase · TanStack Query · Zod · Vitest

- Software-studio platform where clients submit a request and track it to delivery, with a client portal, admin console and real-time notifications on Supabase.
- Build-time prerendering, generated sitemaps and analytics for SEO; hosts the AgentDeck download/update site and playable projects such as Back Bencher.

Tech: React · Vite · Supabase · Vercel

SOFOL — Farmer Credit-Profile Fintech App | [GitHub](#)

AIUB final project

- React Native (Expo Router) app and Express 5 + TypeScript API that lets farmers build a digital credit history, record transactions and apply for loans.
- Separate dashboards for Admin, Bank Officer and Field Officer roles behind per-role guards, Helmet, a CORS allow-list and rate limiting; Supabase PostgreSQL schema for loans, verification and field visits.

Tech: React Native · Expo · Express 5 · TypeScript · Supabase

HACKATHONS & COMPETITIONS

Hackathon Competitor

2024 – 2026

- **SUST CSE Carnival 2026 (Codex Community Hackathon):** QueueStorm Investigator — an AI/API SupportOps copilot for a digital-finance platform.
- **IUT Hackathon:** Office Energy Monitor — NestJS + Next.js system with anomaly detection and a Discord bot.
- **NSU Tech Fest:** Reached the second round with a full-stack solution.

Robotics Competitor — National Robotics Championship (BUBT)

2024 – 2025

- Built autonomous robots (line followers, soccer bots, drones) in C++ on Arduino and competed at national level.

EDUCATION

BSc in Computer Science & Engineering

Expected 2027

American International University-Bangladesh (AIUB), Dhaka

- Coursework: mobile app development, advanced web technologies, software engineering. Final project: SOFOL, a farmer-credit fintech app.
